**For Immediate Release**

### **Business Jet Center Adds 42,000 sq. ft. Hangar to Oakland (OAK) Facility**

With 50 ft. doors, it's the largest business aviation hangar in the Bay Area.

**July 20, 2006, Oakland International Airport, Oakland, CA...**Business Jet Center, a leading provider of Fixed Base Operation (FBO) services, has added a new hangar to their Oakland International Airport (OAK) facility.

The large, 42,000 square foot structure, which more than doubles Business Jet Center's current hangar space, adds valuable hangar capacity at an airport that is growing in popularity in the busy Northern California business aircraft corridor. The expansive hangar, which is the largest facility of its type dedicated to business aircraft in the Bay Area, incorporates oversized 50 ft. tall automatic doors and can accommodate a combination of the largest business aircraft including the Boeing Business Jet, Gulfstream 550 and Global Express.

Formerly utilized as a commercial airlines maintenance facility, the hangar has available office and shop space and integrates an integral high capacity foam fire suppression system and an electronic security system. It is available for both long term and overnight aircraft storage.

Located at 9351 Earhart Road on 13 acres at the North Field of the airport, Business Jet Center has 87,000 sq. ft. of hangar and terminal office space. Recently recognized as a top 15 award winning FBO destination in a national industry survey, Business Jet Center Oakland opened for business in the fall of 2003 and completed a \$4 million renovation of the airport's original 1920's executive terminal building. In addition, the facility received the prestigious ExxonMobile Premier Spirit Gold award as a top 25 national Aviat dealer.

For more information on Business Jet Center's OAK facility and available hangar space, call Mr. Dave Mills at 510-635-4000.

**About Business Jet Center and Business Jet Services**

Business Jet Center is a full-service fixed base operator (FBO) with strategic locations at Love Field (DAL), Dallas, TX and Oakland International Airport (OAK), Oakland, CA. Services include fuel, line service, catering, hangars, concierge and auto rental. Terminal services include customer and pilot lounges, flight planning services, conference rooms and wireless internet.

Business Jet Center is affiliated with Business Jet Services, an aircraft charter, management, maintenance and pilot services company.
