Business Jet Center-Oakland Adds Hangar Space

More than 100,000 sq. ft. of Hangar Space Now Under Management

March 23, 2010, Oakland International Airport, Oakland, CA...Business Jet Center (BJC), a leading provider of Fixed Base Operation (FBO) services, has added more than 15,000 sq. ft. of hangar space to their Oakland International Airport (OAK) leasehold. With the addition, BJC now manages more than 100,000 sq. ft. of designated business and general aviation hangar space making it one of the largest FBOs in the Bay Area.

“Demand for hangar space at our facility has increased steadily over the past 18 months,” said David Mills, Manager of BJC at OAK. “With our excellent location, good weather and competitive pricing, aircraft owners and operators are finding us and making this their base of operations.”

Business Jet Center OAK opened for business in the fall of 2003 and completed a \$4 million renovation of the airport’s 8,449 sq. ft. original 1920’s executive terminal building. Located at 9351 Earhart Road on 13 acres at the North Field of the airport, BJC has been recognized in FBO surveys as the top facility in the Bay Area and consistently ranks among the top three operations on the West Coast. In addition, the facility has received the prestigious ExxonMobil PremierSpirit Gold award as a top 25 national Aviatat dealer five years in a row and has been recognized by ExxonMobil/Western Petroleum for quality control compliance.
